VERTICAL TROPIC EXPERT

Synthetic Green Wall with Class B Fire Resistance Certification

Discover our synthetic green wall, designed to mimic lush tropical plants, now with Class B fire resistance certification. This decorative solution combines aesthetic appeal and safety, meeting the high standards required by professionals in the field.

Benefits

- Ultra-realistic design Dense, natural-looking foliage that adds elegance to any space.
- Guaranteed safety Class B certification ensures high fire resistance, essential for projects requiring strict safety standards.
- Low maintenance No watering or trimming needed; stays pristine with minimal effort.

Characteristics

- High-quality materials: Made from high-density polyethylene (HDPE) for durability and strength.
- Versatile use: Suitable for both indoor and outdoor applications, with UV protection to maintain color vibrancy.
- Easy installation: Flexible backing that can be cut and adapted to different surfaces for quick and effortless setup.

This Class B-certified synthetic green wall is the ideal solution for interior designers, architects, and hospitality professionals looking for a safe yet stylish decorative alternative.
