

HIDECURVE Tricolor

Tricolor artificial hedge

Artificial tricolour hedge with 38 rods/ml, 50% recycled. It offers an aesthetic and practical solution for delimiting your garden or terrace. Create an effective visual barrier while adding a touch of greenery and nature to your outdoor space.

Benefits

Artificial hedge developed and manufactured by the Catral Group in our production plants. Thanks to the work carried out by the R&D department, we have created the first hedge with a realistic cut, mixing 3 different tones of sprigs, to imitate natural hedges as closely as possible. The result is a more realistic appearance and greater screening effect. What's more, in addition to the quality that has been proven over the years, recycled materials have been incorporated into the raw material.

Characteristics

Material : PVC + green plastic-coated wire
Finish : folded ends
Height : Real and exact height
Number of lines : 38 rods per metre
Weight : +/-1,2kg/m²
Colours : light green, dark green, brown
Sheet thickness : +/- 60 microns
Recycled material : +/-50 %
Packaging : HDPE mesh
UV treatment : Yes
Patent: yes
