DTEX: 6,800 (±10%)
Height: 30 mm (±10%)
Gauge: 3/8"
Points per m²: 13,650 (±10%)
Weight: g/m²: 1,300 (±10%)
Points Transven 10cm: 13/10
Color: green
UV stabilizer: Yes
Drainage: Yes

MAINTENANCE TIPS:

Once the grass is unrolled, let it rest for at least 24 hours before installing it.
Once installed, brush the grass frequently, depending on how it is used.
For a better result, use a special brush for artificial grass such as the Nortene BRUSHY model.
To remove dust, sand, or other small debris present in the fibers, a conventional vacuum cleaner can be used.
Apply the CLEAN cleaner and Nortene FRAGRANCE to give it an unbeatable appearance.
