

BELL

Aerated garden cloche

PVC

If you want to ensure normal growth for your vegetables, disease-free and without adding chemicals, the forcing Bell Cloche will be the key. It allows you both to improve growing conditions and overwinter your plants. Thanks to the transparency of the cloche, the plant benefits from the sun's rays.

Benefits

Its height and its air volume can be used to protect and to force the plants over a longer period. Good anchorage thanks to the securing pegs included for the large size. Adjustable ventilation on top in order to promote heat exchanges and avoid overheating.

Characteristics

Thermoformed PVC. Top ventilation. Steel securing pegs included for the large size. Sold in pack of 3 items.
