

HIVERTEX

Non-woven fabric for the protection of plants from frost

For protecting delicate shrubs and plants.

Benefits

Protects chilly or frost-prone plants and shrubs from cold, wind and hail. The winter veil is permeable to air and water, it allows light to pass through. Anti-UV treated, it is reusable for several winters. It is a good thermal insulator: it creates a microclimate and maintains the accumulated heat. Easy to set up, just unfold or unroll then cut.

Characteristics

Made of 45 g/m² non-woven polypropylene. Anti-UV treated. Several sizes.
