

BIOCONTROL

Anti-insect netting

The Biocontrol protective net allows all gardening enthusiasts to protect plantations and crops from the invasion of insects without having to resort to chemicals.

Benefits

To protect vegetable crops like leeks, carrots, onions, cabbage against flies, whiteflies, pimples, etc. Very easy to install with poles or direct installation on a developed crop.

Characteristics

Polyester net. UV resistant. Mesh 1 mm. Weight: 18 g/m². French made.
