

MAXIZIP

1 overwintering bag with zipper

The non-woven polypropylene winter cover, 100 g/m², Maxi Zip, is an effective protection designed for potted plants and shrubs. Indeed, a zip system helps you easily close this cover around the plant, and a tightening system at the base of the plant is provided.

Benefits

Total protection for chilly or frost-prone plants and shrubs: from cold, wind and hail. Permeable to air and water, it lets light through. Anti-UV treated, it is reusable for several winters. Good thermal insulation: it creates a microclimate and maintains the accumulated heat. It is ideal for potted plants and shrubs. The full-height zip allows for quick and easy set-up, easy watering and a drawstring allows for tightening at the base of the plant.

Characteristics

Made of non-woven polypropylene 100 g/m2. Anti-UV treated. Several sizes.
