

STEEL PLAST

Plastic-coated steel stake

This plastic-coated steel stake will remain perfectly straight in all conditions. Very resistant, this stake contains rough edges to make it easier to attach the links used to attach the stakes to the plants. All the lines can be adapted to the plastic steel holder.

Benefits

Protected at both ends to prevent rust.
Roughness allowing good holding of the links.

Characteristics

Made from plastic-coated steel.
Steel coated with PE.
Available in different sizes and diameters to suit any type of plant.
