

# TOMATILLO

## Greenhouse for tomatoes

Easy to assemble, the Tomatillo greenhouse was designed and created for growing vegetables requiring staking. The greenhouse is made up of a steel structure that provides strength and stability, and of a reinforced film to cover the vegetables. Position this greenhouse on top of your vegetables to ensure accelerated growth.

### Benefits

Suitable for crops in height. A green translucent PE reinforced film, tear resistant. An easy to handle door for ventilation and cultivation. A roof slope for rainwater drainage.

### Characteristics

Structure in green epoxy painted steel tube Ø 16 mm. 140 g / m² PE blanket with anti-UV treatment for 1 year. Closure with zip and tie. Dimensions: width 2m, depth 0.77m, height 1.69 / 1.49m.
