

BASFIX SPIRAL

Spiral tutor support

Spiral stakes are an ideal support for tomatoes, but the main drawback is that their small diameter does not give them great stability. BASFIX SPIRAL considerably increases the contact surface in the ground. Easy to set up and reusable for many years, it is made from industrial waste composed of polyplastic-aluminum.

Benefits

Significantly increases the stability of spiral stakes. Easy to put in place. Reusable. Made from 100% recycled poly-plastic. French made.

Characteristics

100% recycled polyplastic-aluminum. Height 250mm. Section 20mm. 7mm hole.
